

Prime Time

¡Welcome to the Tv station! Since today is your first day working as tv technician I will explain you how this place operates, in first place you work here is maintain transmission on air, for it you will need to stay alert in front of any technical fault, watch out! If you not fix these problems quickly the rating will decrease ending the transmission

- UI:

This bar shows the rating, if you fail in fixed some technical problems would decrece, watch out! if decrees much you will lose.

This is the time you have after the finish of the game.

Here you can see the different scenes, the red asterisk indicate which section is on air, watch out! Keep in mind that you can't fix the problems in the scene on air.

Fixed elements in the scene:

the base of your job is fix things, accompany me I 'will show you some things of which you may need to fix.

The fusible have more than ten without change, so is possible that they wreck soon, have an eye in them

The spotlights have more than five years, the bosses say that they will change tem but here we are..., take care of them.

Our dear Dorothy..., this camera has more time here than my, tends to fade, take care her she is other of the team.

Remember, if you leave alone much time the difficult for fixed it will raise.

How fix things

Obviously problems will not fix alone, so in first place you should press de left button of the mouse in the machine that you want to fix, because is your first work day I´ will teach you how fix the spotlights.

In this case your mission is change the spotlights, for it you need put the bulb in the correct place, simple no? for it you only need press the left bottom of the mouse in the correct moment.

For last remember if you not are able to fix one problem in the first try, the difficulty will raise and rating will decrease, so this is all now go to work!... break a leg novate.
