

PIECE BY/OR PIECE RULES

The point of the game is to get more points than other by guessing shapes.

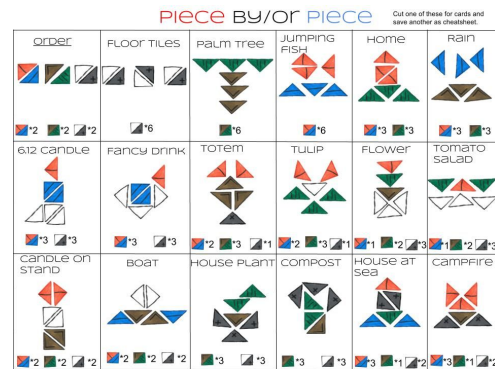

Shapes contain double sided two-color pieces. They have different color on thier sides.

Shapes cheatsheet is important and should be in a place that every player can see.

There are two roles in this game; player and placer. Player try to guess the shape as soon as possible. Placer tries to put pieces down in a way that causes player to guess wrong.

Needed in game:

- 2-6 Players
- 15 - 45 Minutes of time
- Shapes cheatsheet
- Number of players*3 Shape cards
- 6*3 double sided color pieces (red/blue, brown/green and white/black)
- Table/etc flat surface for gaming.

STARTING THE game:

- Randomise shape cards.
- Place color pieces on separate piles on table.
- Deal 3 facedown shape cards to every player.
- Players check their cards and return one of them to table face down, creating card pile.
- First placer is the player that returned card fastest.
- Role of placer goes round the table leftwise between shape cards.

PLAYING THE Game:

1. Placer pick one of his/her card as the current guessed one. And if they have another card they place it facedown on table as a trap.
2. Placer pick one of color pieces found in the current shape and places it to the table. Piece's location or upward side doesn't matter since placer dont have to share anything other than what piece is added.
3. Players can guess the shape one per piece if they want to. Placer will tell if the guess is correct, wrong or trap. Player are allowed to move and turn shapes if it would help their guessing.
4. After all players have guessed or skip'd their turns return to place 2(placer places another piece) unless the next piece would be the last of the shape which causes the placer win the card being guessed. Placer get another card form the pile if there are any and picks up the possible trap card.
5. Role of placer rotates leftwise and return to place 1(placer pick shape).
6. Game end when all the shape cards have been used and the one with most of them wins.

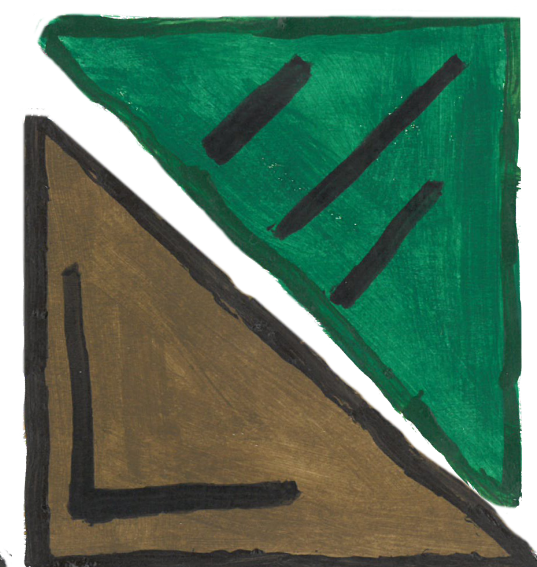

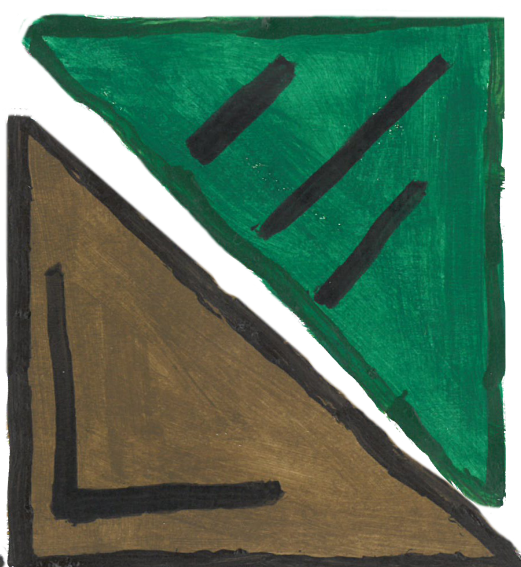

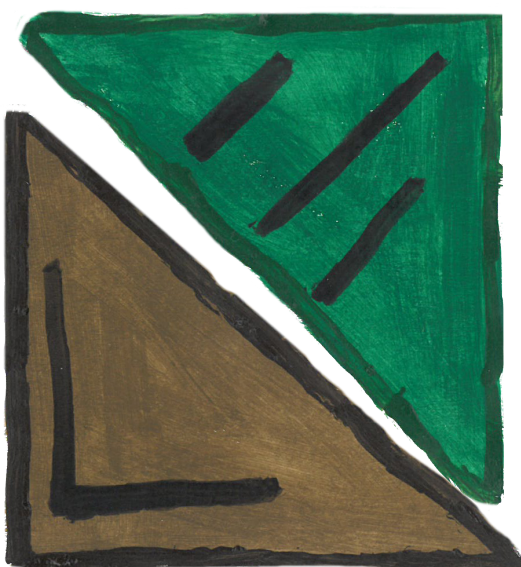

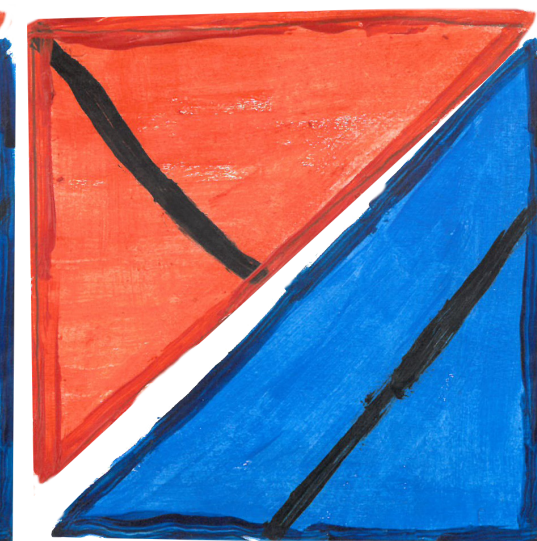

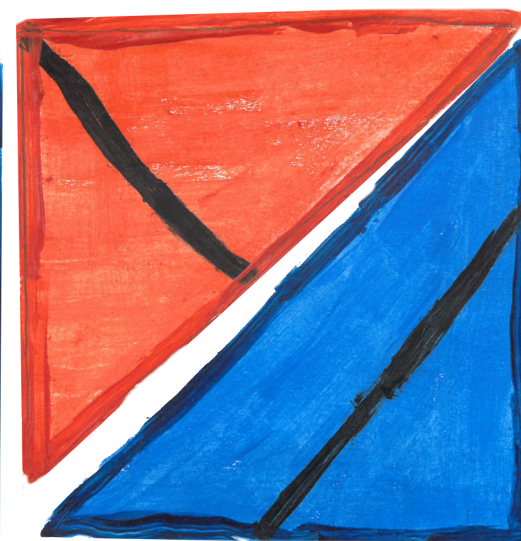

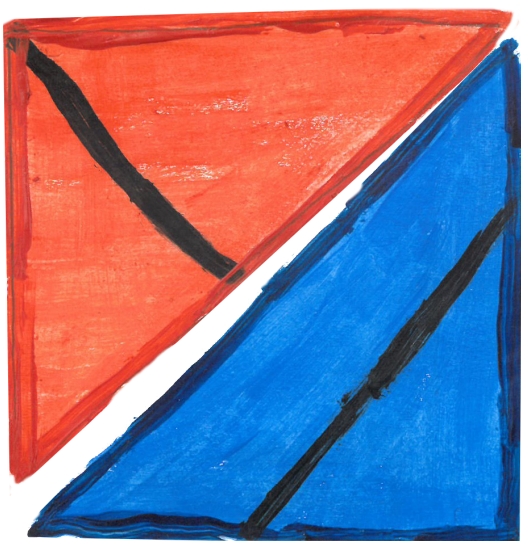

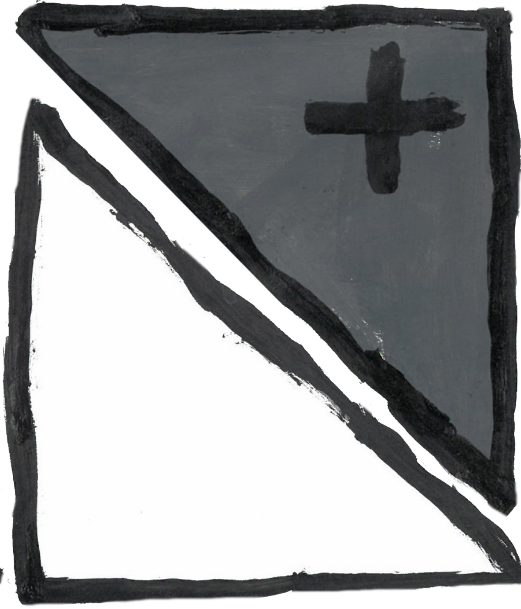

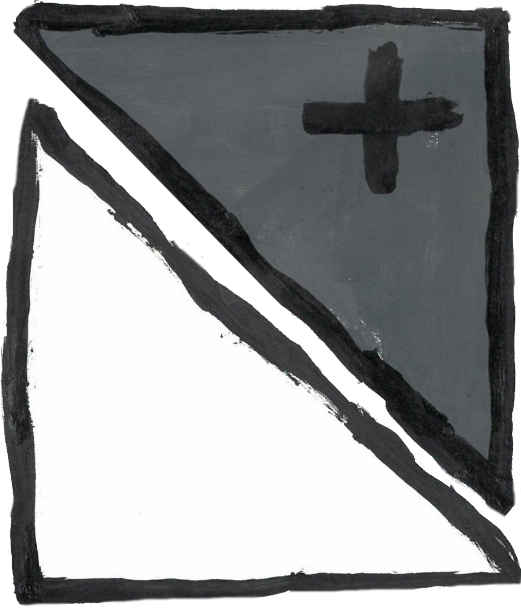

GUESSES:

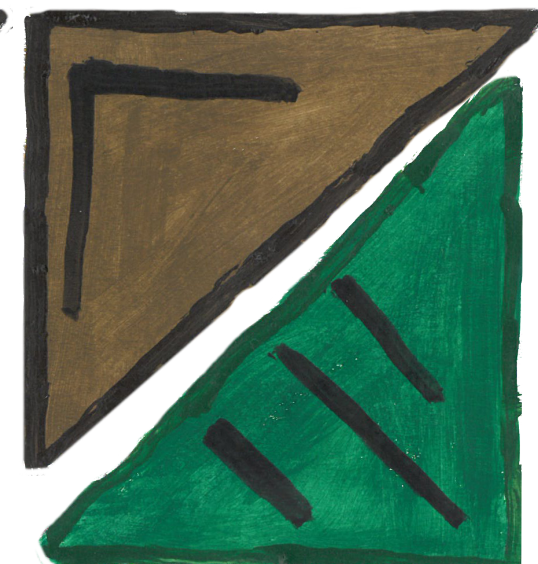

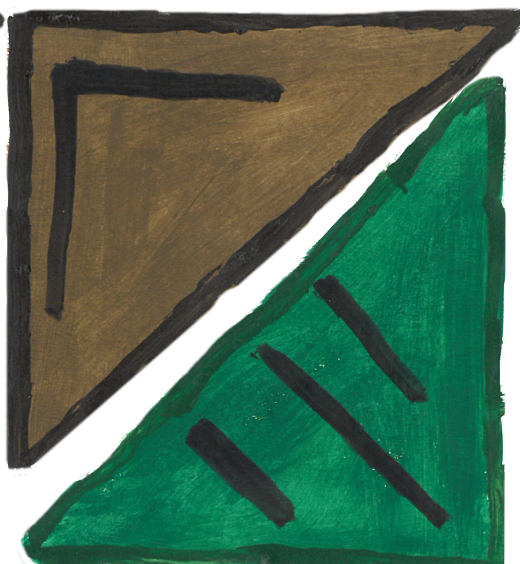

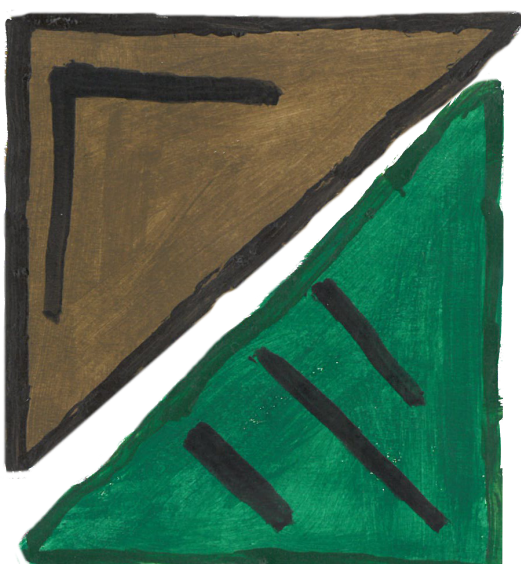

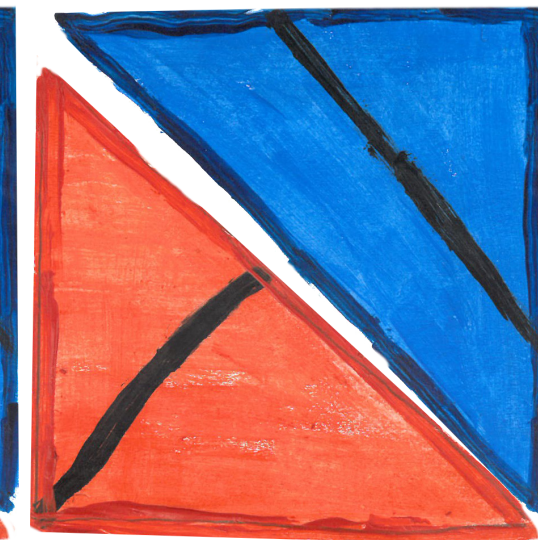

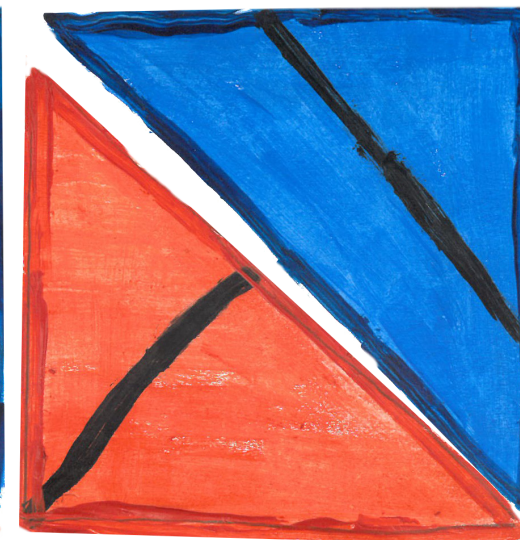

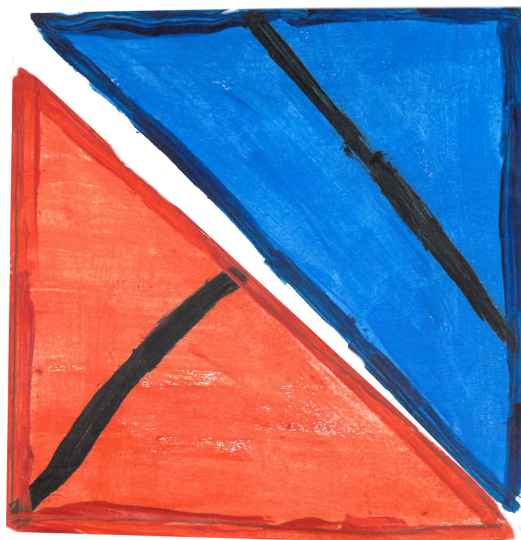

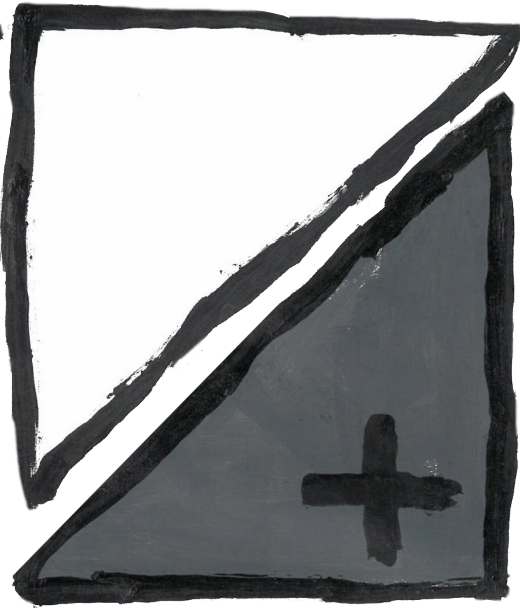

Right: If player guesses the shape they will win the card. Placer get another card form the pile if there are any. Placer returns all the used pieces to their piles. Placer picks up the possible trap card

Wrong: After wrong guess player can't guess again before next piece is placed.

Trap: When player guesses the current trap card the placer wins current card and the trap card. Placer get another card form the pile if there are any. Placer returns all the used pieces to their piles.

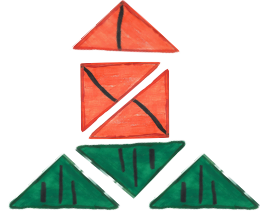

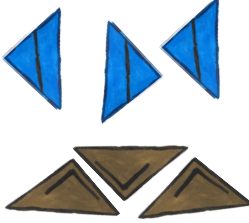

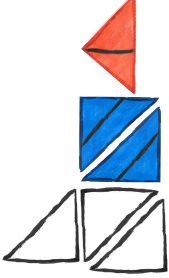

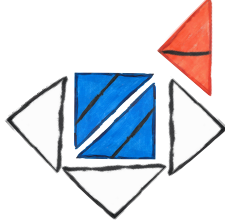

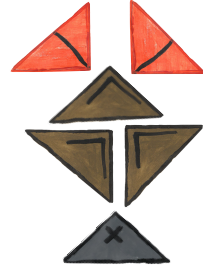

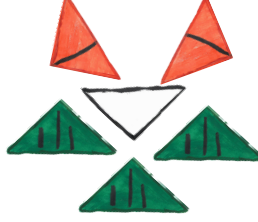

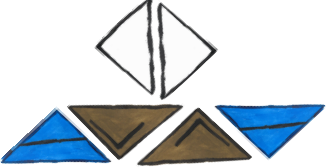

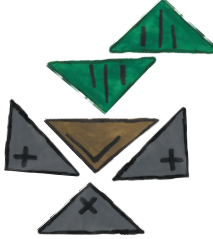

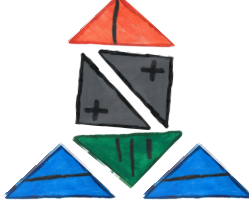

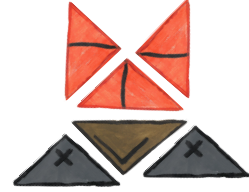

PIECE BY/OR PIECE

Cut one of these for cards and save another as cheatsheet.
